9. On the **Make a Payment** page, select a payment method and complete payment information fields.
 - Trout CPA strongly recommends selecting ACH Debit instead of Credit/Debit Card. The PA Department of Revenue cannot easily trace credit card payments. This also avoids fees assessed on credit card transactions.
10. ACH Debit Payments:
 - a. In the **Payment Channel** section, select **Checking**. Do not select Savings. Most savings accounts do not allow ACH payment transactions. A denied payment will incur penalties for insufficient funds.
 - b. In the **Payment** section, enter the amount shown on your **2024 Tax Return Filing Instructions – Pennsylvania Fiduciary Income Tax Return**.
 - c. When choosing a **Payment Date**, always ensure funds will be available in the account prior to the scheduled payment date to avoid penalties for insufficient funds.
11. Click **Submit**.
12. Print the verification page and save with your tax records.

NOTE: The funds should be withdrawn within five business days. If they are not, contact your tax preparer.
